

In-Ground Leaf Net Installation Instructions

1. INSTALL YOUR LEAF NET ON TOP OF YOUR WINTER COVER.
2. If you find that your leaf net is too small, do not stretch it across the pool in an attempt to make it fit. Your leaf net should fit your pool as shown in Diagram 1, below.

3. Your leaf net is sized for a maximum water drop below the deck of 18". If you normally drop your water more than 18" in the Fall, return your leaf net for a larger size. Refer to Diagram 1 for proper fit.
4. Do not use bricks or sharp blocks to weigh down your leaf net as they will cut and scuff the leaf net. We recommend using water tubes for leaf net installation.
5. If you tie your leaf net to a fence or other permanent structure, be sure to use a flexible bungee cord. This flexible cord will allow the leaf net to shift as snow and ice accumulates without pulling out the corner tabs or straps. Water tubes must still be used.

Above-Ground Leaf Net Installation Instructions

1. INSTALL YOUR LEAF NET ON TOP OF YOUR WINTER COVER.
2. Place leaf net over the entire pool and let it rest on the water.
3. Your leaf net is sized for maximum water drop below the deck of about 12". If you drop your water more than 12", order a larger size.
4. Your leaf net should hug the side wall of your pool and lay on top of the water as in Diagram 2, lower right. Stretching the leaf net as in Diagram 3 will damage it.
5. Thread cable through the leaf net loops and use the ratchet to tighten it.
