# IntelliFlo® vF

Intelligent Variable Flow Pump

*The most intelligent pool pump  
technology...and huge energy savings*

# Save thousands in operating costs with the pump that started an energy-saving revolution

Cam and Ramp™ lid removes easily, locks in place with a quick quarter turn and is see-through for easy basket inspection

Oversize strainer basket extends time between cleaning

Integrated keypad displays all operating settings, including wattage consumed

Permanent magnet motor, TEFC design and the ability to operate at lower speeds make IntelliFlo® the quietest pump on the planet

Totally enclosed fan cooled (TEFC) design keeps motor shielded from the elements for extended life

Simply put, the IntelliFlo® vf is the smartest pool pump ever invented. Based upon which features are being run, it calculates the minimum flow needed to power that task to achieve maximum performance and minimum energy use.

Virtually every task performs more effectively when IntelliFlo is on the job. You may not even know it's operating. That's how

incredibly quiet IntelliFlo pumps are. Plus, there are even more benefits. By operating slower and running for longer periods of time, it reduces the occurrence of algae. It also makes your filter more effective because it has more time to strip particles from the water. No wonder the IntelliFlo pump family has outsold all other variable-speed brands **combined**.

# Energy savings of up to 90% each year

## Remarkably Lower Operating Costs

- Intelligent on-board microprocessor determines the minimum water flow for maximum performance and minimum energy use.
- Ultra-efficient permanent magnet motors, as used in advanced hybrid cars, achieve required flow rates with less effort than traditional pumps.

**Just how much can you save?** This chart shows realistic estimates when comparing a traditional energy-efficient single-speed pump to IntelliFlo in a 20,000 gallon pool.

<sup>1</sup>Savings based on variable speed pump compared to a single-speed pump running 12 hours per day in a 20,000 gallon pool. Actual savings may vary based on local utility rates, pool size, pump run time, pump horsepower, pump rpm, plumbing size and length, pump model, service factor and other hydraulic factors.

Energy cost per kilowatt hour (kWh)	Estimated IntelliFlo savings per year <sup>1</sup>	Estimated IntelliFlo savings after 5 years <sup>1</sup>
\$0.16	up to \$1,500	up to \$7,500
\$0.20	up to \$1,800	up to \$9,000
\$0.30	up to \$2,700	up to \$13,500

## Estimate Your Savings Online

How much can you save? See the Pool Pump Energy Savings Calculator at [www.pentairpool.com/pumpcalc](http://www.pentairpool.com/pumpcalc).

## Dramatically Longer Life

- Permanent magnet motor runs cooler, with less vibration than outmoded induction motors. Less wear and tear on pump components and other equipment.
- Totally Enclosed Fan Cooled (TEFC) design provides exceptional protection from the elements.
- Built-in diagnostics that detect the most common causes of premature wear and tear—loss of prime, overheating, freezing and voltage irregularities.

## Quieter than a Whisper

- The quietest pump on the planet—thanks to its permanent magnet motor, TEFC design and its ability to operate at lower speeds.

## Improves Filtering and Water Chemistry

- Slower, longer run times reduce algae build-up.
- More effective filtration—small particles aren't forced through your filter under high pressure.
- Makes automatic chlorinators and chemical dispensers more effective because water moves slower for longer periods of time.

## Easily Adapts to Your Changing Needs

- Add or change equipment without reducing performance or efficiency.
- Lets you adjust flow to water features to alter their appearance and performance.
- Compatible with IntelliTouch®, EasyTouch® and SunTouch® automation systems for added control.

# IntelliFlo® VF Intelligent Variable Flow Pump

NOTE: The chart to the left demonstrates performance rates at factory preset speeds of 750 RPM, 1500 RPM, 2350 RPM and 3110 RPM. However, flow rates can also be custom programmed between the ranges of 400 RPM and 3450 RPM as indicated by the blue tint.

## Install IntelliFlo® Today and Be Rewarded for a Lifetime

"The most valuable investment you can make for your pool"—that's what the pros say about IntelliFlo. Plus, with all the additional benefits achieved by installing this new technology, choosing an IntelliFlo is an absolute no brainer. Why pay thousands in unnecessary electrical costs? Contact your pool professional today to take the first step towards a pool that operates more effectively and efficiently.

## An Eco Select™ Brand Product

The Eco Select™ brand identifies our "greenest" and most efficient equipment choices. These products save energy, conserve water, eliminate noise, or otherwise contribute to a more environmentally responsible equipment system.
