pool owners™

## The Big Fish In Pool Cleaners.

Had enough with manual pool cleaning maintenance? Want to start enjoying your pool more? Then throw a whale in your pool. That's right. Wanda the Whale® – the most intelligent above-ground-pool cleaner you can buy. And it's only from Hayward.

Exclusive SmartDrive® programmed steering system.

Using our patented SmartDrive programmed steering system, Wanda the Whale won't miss a spot – gobbling up everything from microscopic dust to larger debris. And it does so automatically, giving you and your family more time to enjoy your pool.

## Automatic Pool Cleaner for Above-Ground Pools

No manual pool cleaning makes a whale of a difference.

Wanda the Whale® provides you with easy, trouble-free operation. You never need to empty or replace debris bags. And because Wanda the Whale works with your existing filtration system, no extra energy-consuming booster pump is required. Everything for simple, 10-minute-or-less installation is included – even the hoses.

This whale swims with a smart crowd. As part of a complete family of superior quality products designed to keep your pool at its sparkling best, Wanda the Whale® is the smart alternative to the drudgery of manual cleaning. And it's from Hayward, the company that engineered automatic pool cleaning technology.

Wanda the Whale covers a lot of ground automatically.

Wanda the Whale utilizes patented SmartDrive® programmed steering to clean faster and more thoroughly than random cleaners. After you see how effortlessly Wanda the Whale keeps your pool clean, you'll never see a need to manually clean your pool again.

This whale knows how to use it's spout.

Plus, Wanda the Whale improves water circulation by acting as a moving main drain, pulling water from the bottom of your pool as it moves. Your water circulates and your pool stays cleaner – without the overuse of chemical sanitizers.
